

Mr Karena's Lesson Six – 19 January

Year 9 “Songs with Values”

Task:

Students will learn how to use the following advanced functions in Garageband:

Changing/correcting note mistakes in “Piano Roll” mode

By clicking on one of these dashes you have 4 options:

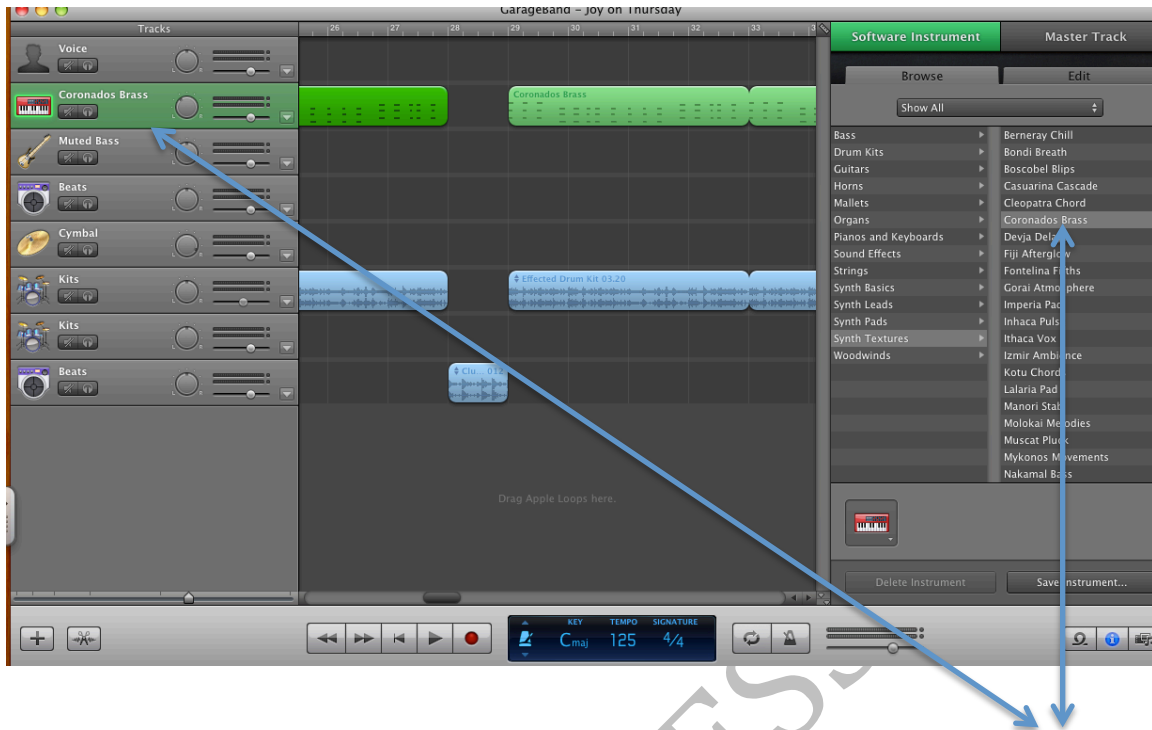

- (1) Delete this note
- (2) Clicking on the right hand side of the bar and making the bar **longer** will lengthen the duration of the note
- (3) Clicking on the bar and moving it up or down will change the pitch of the note
- (4) Clicking on the right hand side of the bar and making the bar **shorter** will shorten the duration of the note

Writing out Music Notation

When using this option, this gives one limitless opportunity for experimenting, creating and composing different ideas and is very useful for students who are accomplished musicians.

You can correct any mistakes made while composing. You can delete any unwanted notes.

Adding or changing tracks

There are 1000's of tracks which are a combination of individual instruments, a combination of families of instruments (eg strings, brass, woodwind) or numerous sound effects available for composers to try and listen for the type of timbre (sound) needed to use for a musical track.

These are some of the most interesting techniques which can be used in Garageband. The main idea with any composing/creating with music is to try and experiment with as many sounds and combinations of sounds to
